

Unlock the Future of Cybersecurity

The Ultimate Ransomware Protection Toolkit

Are you ready to shape the future of cybersecurity? Join us on this journey towards uncompromising protection.

Invest in Gryphon today and fortify your defenses against ransomware like never before.

Protect yourself
against APT groups

Gryphon is not just a tool; it's your frontline defense against the ever-evolving threat of ransomware, offering advanced Ransomware and APT Protection. Dive into the realm of groundbreaking technology and witness the power that **Gryphon** brings to the table.

Gryphon — Unveiling a New Era in Cybersecurity

Smart Features

- ✓ **Application Inventory** — Complete view of installed software and known vulnerabilities
- ✓ **Advanced Integration** — Centralized alert monitoring and forwarding
- ✓ **Reputation-Based Process Detection** — Proactively identify threats using reputation analysis
- ✓ **Windows Defender Integration** — Monitor Defender status and forward detections
- ✓ **Granular Blocking** — Control program execution by file path, hash, or name
- ✓ **Advanced Firewall Control** — Enhanced firewall features beyond standard Windows Firewall
- ✓ **Endpoint Isolation** — Instantly disconnect compromised endpoints from the network
- ✓ **Real-Time Detection** — Built-in YARA rules for instant threat, file, and script blocking
- ✓ **Server-Side Task Manager** — Live, centralized process explorer for rapid investigation
- ✓ **Remote PowerShell Console** — Execute commands in real time with smart autocompletion
- ✓ **Endpoint File Management** — Easily browse, upload, and download files on endpoints
- ✓ **RDP Client** — Remotely access endpoints, even on private networks

Service Extension

- **Integration with 3rd party Network and Security Solutions**
- Adversary Deployment Control Center and Agent
- Hardening and Update Processor
- Vulnerability and Data Leaks Intelligence

APT Attack Protection

- Endpoint Management
- Isolation and Hardening
- **Threat Hunting and Intelligence**
- Search and Investigation

Ransomware Protection

- Behavioral Real-Time Encryption Detection
- **Process Injection Protection**
- LOLBin Blocking
- Isolation and Incident Response
- File Recovery
- VSS Protection

Advanced Malware Detection

- Vulnerability, Update and Patch Management
- **System Behavior Analysis**
- Executable Analysis
